

BEFA Water filtering system

100% Free of killer germs and 99% free of viruses

Introduction

The most important food is pure drinking water - from the own water supply!
But, water will be full of bacteria, legionella, pathogen germs, turbid solids and more!

With the BEFA Water Ultrafiltration System (BUF) you receive the drinking water 100 % free from bacteria, pathogen germs, legionella, turbid solids and 99% free from viruses, tested by a state laboratory.

The result is chemical untreated, drinking water for the whole family!
All essential minerals and trace elements to be preserved in solution form

Benefit:

- Self-sufficiency and independency of any public water suppliers
- Disused wells and springs can be re-activated
- No interruption of the water supply during heavy rain and cloudy water
- Small entrepreneur to fill water in bottles and sell it
